PREPARATION REQUIREMENTS FOR BED BUG TREATMENT

1. Remove all sheets, pillows and bedding from beds. These items should be laundered in HOT water and dried in a HOT dryer or dry cleaned. Remove all pillows, throws and covers from couches and chairs. Place these items in a sealed bag and launder as well.
2. Remove all items from the dresser and put clothing in sealed bags. Launder as in step 1. Dressers need to be cleared off so that they can be checked and treated for bed bugs and eggs.
3. Remove all items from the bedroom closet and place in black trash bags and sit outside in the sun for 8 hours if possible.
4. Eliminate as much clutter as possible in all rooms of the house.
5. Move furniture and bed frames at least 18" from the wall to allow for inspection and treatment of carpet edges and baseboards.
6. Air pump driven mattresses need to be disconnected until 2nd service is complete.
7. Vacuum the entire carpet especially along the edges and all the living room furniture cracks and crevices with your vacuum crevice tool.
8. Vacuum the entire mattress and box springs using the crevice tool where needed. Remove the mattress and boxsprings from the bed frame and stand them against the wall to allow for inspection and proper treatment process. When all vacuuming is finished, discard the vacuum bag in an outdoor trash container.
9. You may not want to put everything back into the rooms since all the preparation work will need to be done before we return and do the final treatment in 30 days.

PETS:

1. Aquariums need to have the air pumps disconnected and should be well covered with a damp towel.
2. Birds, dogs, cats and other pets should be removed from the residence for 1-4 hours.

Please note:

If not prepared, Absolute Pest Control will not complete service until preparation work is complete. Bed bugs are difficult to control and your cooperation and efforts are required. **It takes time to eliminate the bed bugs and results are not immediate. You may still see bed bugs for up to 30 days.**
